## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Pokotylo on April 7, 2006.

The application has been amended as follows:

In claim 1, line 27, delete (k/n), and insert -- the ratio of k/n --.

### ***Allowable Subject Matter***

Claims 1 and 3 are allowed.

The following is an examiner's statement of reasons for allowance:

As for claim 1, the prior art fails to teach or fairly suggest the use of an image pickup device having a normal driving mode and an n-addition driving mode, wherein in the n-addition driving mode, an overflow level setting means for controls a substrate bias voltage of the imaging device such that the substrate bias voltage is a value obtained by multiplying (k/n) with the substrate bias voltage in the normal driving mode (k being  $SatH/OFL$ , wherein SatH is a saturated level of the horizontal transfer path and OFL being an overflow level of the charge accumulating portion).

Art Unit: 2622

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
